

CHRISTMAS MALE GUPPY

Poecilia reticulata

FEEDING

Omnivorous. Eats most aquarium foods.

ADDITIONAL COMMENTS

Celebrate Christmas with our green snakeskin and red guppies! Very popular aquarium fish. Breeds very easily, best kept with similar sized fish in a planted community tank. Do not keep with fin-nippers such as Tiger Barbs. Suitable for nano tanks.

| | |
|--------------------------|-----------------------|
| Temperature: | 22-26 degrees celsius |
| pH Level: | 7.0-8.0 |
| General Hardness: | Moderate |

RANGE

Central America and Northern South America

REPRODUCTION

Guppies are a livebearer, the females giving birth to fully formed fry. Males will mate with several females: from one mating females give birth to multiple batches of fry. Gestation period is around 28 days at 26-27°C, longer at cooler temperatures. Very easy to breed.
