

APHYOSEMION BIVITATTUM LAGOS

Chromaphyosemion bivittatum

usually accepts frozen foods and dry foods.

ADDITIONAL COMMENTS

Prefers a planted tank and looks best against a darker substrate. Use a tight fitting cover as all Killifish are expert jumpers. Keep either in a single species tank or with similar sized peaceful species. Males are more colourful and have longer fins.

Disclaimer: The information provided here is of a general nature only. There are site specific factors that are not addressed here that may also affect the health and well being of your fish, as such Coburg Aquarium will not be held liable for the performance of your fish.
