KEEPING SNAPSHOT

Difficulty:	Intermediate
Max Growth Size:	8 cm
Temperament:	Territorial, but relatively peaceful.

PREFERRED WATER PARAMETERS

Temperature:	23-27 degrees celsius
pH Level:	7.5-8.5
General Hardness:	Hard

RANGE

Lake Malawi, rocky areas around Likoma Island

REPRODUCTION

Mouthbrooder: after spawning, the females incubate the eggs in their mouth until the fry are free-swimming. Males will mate with multiple females. The fry are easily raised with first foods such as baby brine shrimp.
