

### DRAGON SCALE MALE FIGHTER

*Betta splendens*

Carnivorous. Eats all normal foods, appreciates occasional feeds of live foods.

#### ADDITIONAL COMMENTS

Male Fighters are extremely popular pets because of their exotic finnage and bright colours. In nature these fish inhabit very weedy habitats and are perfectly adapted to living in small spaces. If kept in a nano tank or other small receptacle, ensure the Fighter is not kept too cool. One of the most popular fighters with iridescent scales, complimented by their coloured fins.
