

KNOB-TAILED GECKO

Nephurus levis

FEEDING

Crickets and woodies dusted with vitamin supplement

ADDITIONAL COMMENTS

These geckos are sexually dimorphic, with the females being large enough for males to climb on 'piggyback' style.

KEEPING SNAPSHOT

Difficulty:	Beginner - Intermediate
Max Growth Size:	10 - 12cm
Temperament:	Skittish.
Licensing:	Private Wildlife (Basic) Licence

HABITAT

Heating:	26 - 30 degrees C
Lighting:	N/A - nocturnal
Environment:	Secure lid. Sandy substrate deep enough to burrow. There should be a 'moist' end to the enclosure, where the sand clumps well enough for the gecko to build a burrow.

RANGE

New South Wales, Northern Territory, Queensland, South Australia, Western Australia
