

### KNOB-TAILED GECKO

*Nephurus levis*

#### FEEDING

Crickets and woodies dusted with vitamin supplement

#### ADDITIONAL COMMENTS

These geckos are sexually dimorphic, with the females being large enough for males to climb on 'piggyback' style.

#### KEEPING SNAPSHOT

<b>Difficulty:</b>	Beginner - Intermediate
<b>Max Growth Size:</b>	10 - 12cm
<b>Temperament:</b>	Skittish.
<b>Licensing:</b>	Private Wildlife (Basic) Licence

#### HABITAT

<b>Heating:</b>	26 - 30 degrees C
<b>Lighting:</b>	N/A - nocturnal
<b>Environment:</b>	Secure lid. Sandy substrate deep enough to burrow. There should be a 'moist' end to the enclosure, where the sand clumps well enough for the gecko to build a burrow.

#### RANGE

New South Wales, Northern Territory, Queensland, South Australia, Western Australia
