

CYATHOPHARYNX FURCIFER KABOGO BLUE

Cyathopharynx furcifer

ADDITIONAL COMMENTS

Part of a group of species known as Featherfins, this is a large species with many geographic variations. Keep in a group in a very large aquarium with large amounts of fine sand (2mm or smaller) for the males to construct their sand castle nests. Males start to mature and colour up at 10-12cm.

Disclaimer: The information provided here is of a general nature only. There are site specific factors that are not addressed here that may also affect the health and well being of your fish, as such Coburg Aquarium will not be held liable for the performance of your fish.
