

GEOPHAGUS PEARL HORSEFACE

Geophagus brasiliensis

ADDITIONAL COMMENTS

Needs hiding places. Pairing fish. Fine sand (eg 2mm) is useful for this fish as it likes to sift the substrate for food. Large specimens make excellent display fish, but can be very aggressive.

Disclaimer: The information provided here is of a general nature only. There are site specific factors that are not addressed here that may also affect the health and well being of your fish, as such Coburg Aquarium will not be held liable for the performance of your fish.
