

### RED RANCHU

*Carassius auratus auratus*

Omnivorous. Eats all normal foods, including aquatic plants.

### ADDITIONAL COMMENTS

Developed in Japan, Ranchu are very popular amongst goldfish enthusiasts. Similar to the Lionhead, except the Ranchu's back is rounded downwards towards the tail at the caudal peduncle. Ranchu develop very impressive head growth as they mature. Suitable for indoor tanks and outdoor garden ponds (but provide protection from predators if kept outdoors.)
