| | |
|-------------------------|------------------------------------|
| Difficulty: | Intermediate |
| Max Growth Size: | 3.5 cm |
| Temperament: | Peaceful, keep with small species. |

PREFERRED WATER PARAMETERS

| | |
|--------------------------|-----------------------|
| Temperature: | 15-27 degrees celsius |
| pH Level: | 6.0 - 7.4 |
| General Hardness: | Soft-Moderate |

RANGE

South-eastern Queensland, mainly found in Tin Can Bay - Sunshine Coast area and on Fraser Island.

REPRODUCTION

Large eggs scattered amongst plants, hatching time approximately 3 weeks. Suitable first foods for the fry include powder foods, vinegar eels and Artemia nauplii.

FEEDING

Omnivorous. Feed small sized foods, including frozen & live foods.

ADDITIONAL COMMENTS

When kept in a school, Blue-eye males put on elaborate fin displays to impress females and to outshine rival males. Best kept in planted aquaria, either in a single species tank or with other small fishes. Suitable for nano tanks, also useful for mosquito control in frog ponds in the sub-tropics. Males show their full breeding colour only after they are fully settled. Fully protected in Queensland, (please note NOT available for sale in Queensland.)
