

PURPLE SPOT GUDGEON - FLINDERS RANGES

Mogurnda clivicola

ADDITIONAL COMMENTS

This species is considered endangered in the wild, it is restricted to one small creek in the Flinders Ranges in South Australia (the only other population of this species occurs in a small area of the Barcoo River in Queensland). An attractive species, it is easily kept but provide plenty of hiding places as it can be quite aggressive.

Disclaimer: The information provided here is of a general nature only. There are site specific factors that are not addressed here that may also affect the health and well being of your fish, as such Coburg Aquarium will not be held liable for the performance of your fish.
