

WESTERN CARP GUDGEON

Hypseleotris klunzingeri

ADDITIONAL COMMENTS

Useful for mosquito control in garden ponds, and as a food fish for larger species in farm dams. Males develop larger more colourful fins. There are several closely related species all commonly known as Carp Gudgeons.

Disclaimer: The information provided here is of a general nature only. There are site specific factors that are not addressed here that may also affect the health and well being of your fish, as such Coburg Aquarium will not be held liable for the performance of your fish.
