

PEACOCK CICHLID - ALBINO

Aulonocara stuartgranti

Carnivorous. Dry foods and frozen foods.

ADDITIONAL COMMENTS

Peacock Cichlids are among some of the most popular of Malawi Cichlids, available in a wide range of colours including the albino which also usually becomes very red when mature. Provide plenty of rocky areas for hiding places.

| | |
|-------------------------|---|
| Difficulty: | Intermediate |
| Max Growth Size: | 14 cm |
| Temperament: | Territorial, keep with Rift Lake Cichlids |

PREFERRED WATER PARAMETERS

| | |
|--------------------------|-----------------------|
| Temperature: | 23-27 degrees celsius |
| pH Level: | 7.5-8.5 |
| General Hardness: | Hard |

RANGE

Africa: Lake Malawi

REPRODUCTION

Mouthbrooder: after spawning, the females incubate the eggs in their mouth until the fry are free-swimming. Males will mate with multiple females. The fry are easily raised with first foods such as baby brine shrimp.

FEEDING
